EDUCATION

University of Maryland | College Park, MD

May 2028

Bachelor of Science in Computer Science | Minor in Mathematics

GPA: 3.97 / 4.00

Relevant Coursework: Algorithms, Advanced Data Structures, Computer Systems (C & Assembly), Cloud Computing with AWS, Object-Oriented Programming I & II (Java), Organization of Programming Languages (OCaml & Rust), Discrete Structures, Linear Algebra

SKILLS

Programming Languages: Python, Java, TypeScript; familiar with JavaScript, SQL, C++, C, HTML, CSS, Rust, Assembly, OCaml, MATLAB

Web Frameworks/Libraries: React, Node.js, Flask, Tailwind CSS, Zod, Drizzle

Developer Tools: Git, GitHub, GitLab, Linux, VSCode, Claude Code, Jira, Neon, Firebase, Vercel, BigQuery, Inngest, ngrok, Twilio, Zapier

WORK EXPERIENCE

American Operator | Austin, TX

Jun 2026 - Present

Software Engineer Intern

- Deployed a full-stack TypeScript KPI dashboard (React, Postgres) with role-based access control and dynamic, per-company KPIs
- Shipped Inngest pipelines syncing BigQuery metrics to a live dashboard and weekly KPI emails to leadership, replacing manual reporting
- Automated accounts payable with an AI pipeline that reads invoice PDFs, matches costs to jobs, and files 70+ Knowify bills every month

Easy Dynamics | McLean, VA

Jan 2026

Software Engineer Intern

- Designed and built an IT service desk agent in Copilot Studio, trained on SharePoint libraries, to resolve common employee IT questions
- Created Power Automate flows and OAuth 2.0 (3LO) custom connectors to implement automated ticket creation to Jira's API
- Developed an Azure Blob to store Jira tickets, used PowerShell scripting to automate uploading ticket JSON contents and attachments
- Achieved a 27% automated resolution rate and reduced average response time from 24 hours to under 10 seconds

First-Year Innovation & Research Experience | College Park, MD

Aug 2025 - Present

Quantum ML Undergraduate Researcher

- Researched quantum Wasserstein GANs for high-resolution image generation, evaluating FRQI image encoding across MNIST data
- Diagnosed a CPU-bound bottleneck in the quantum GAN pipeline (JAX) and cut image-generation time from 30 to 2 hours via GPU

Panda Programmer | Gaithersburg, MD

May 2024 - Aug 2024

Computer Science Instructor

- Mentored 50+ K-8 students in Scratch, Python, JavaScript, HTML, CSS, and robotics through hands-on programming projects
- Presented lessons on data structures, control flow, event-driven processing, serial and parallel execution, and animation

PROJECTS

Redress | 2nd Place Winner, Patriot Games 250 Hackathon

- Full-stack React and TypeScript app where an AI agent helps citizens file complaints and pushes government agencies to respond
- Designed to automatically route cases to the right agency, email via AgentMail, auto-escalate stalled replies, and text citizens via Linq
- Cuts constituents' per-case time ~90% and agency-reply turnaround from days to same-day, across 10 federal agencies

Sell4Impact

- Full-stack React and TypeScript dorm marketplace for college students to buy/sell secondhand dorm decor sustainably and affordably
- Integrated Firebase Auth, real-time Firestore sync, role-based dashboards, dynamic inventory, search, cart, and Cloud Storage uploads
- Offsets colleges' \$192/student annual furnishing spend and 640 lb/student national furniture waste footprint, via resale

Gotcha!

- Real-time shoplifting detection app using React (TypeScript), Flask, and Roboflow to analyze video and flag suspicious behavior
- Engineered a synchronized API pipeline (Gemini, ElevenLabs, Twilio) via ngrok to trigger automated, descriptive emergency phone calls

LEADERSHIP

Scouting America

May 2015 – Aug 2025

Eagle Scout & Troop President

- Led 70+ Scouts, administered monthly campouts (200+ attendees), and organized week-long summer camps (1,000+ attendees)
- Mentored a 30+ Scout leadership team, organized annual food drives (60,000+ lbs), and recruited in Scouting's national honor society

Kids are Scientists Too

Sep 2022 – May 2025

Instructor & Treasurer

- Instructed 60+ 4th-5th graders through 30+ science experiments, mentored 100+ club members as teachers, and organized curricula
- Managed weekly finances and payments, created and presented lessons, and coordinated time logistics and transportation
